Regulatory Docket File

December 27, 1976

Mr. George W. Knighton, Chief
Environmental Projects Branch No. 1
Division of Site Safety and
Environmental Analysis
U. S. Nuclear Regulatory Commission
Washington, D. C., 20555

Dear Mr. Knighton:

Re: Docket Nos. 50-275 50-323

Reference is made to your letter dated December 14, 1976, addressed to Mr. E. C. Fullerton, Director, California Department of Fish and Game, and the attached comments by N.R.C. staff.

I note on Page 6 of your comments the following:

"In this regard, on May 18, 1976, the staff sent a letter to Kenneth Jones of the California Regional Water Quality Control Board requesting the basis for approval of the ΔT at 22°F, but no response was received."

In reviewing your letter of May 18, 1976, I see no request for response, nor do I note anything which calls for either reply or comments. It was interpreted as a confirmation of earlier discussions, as noted in its first paragraph. If you have a different understanding, I would appreciate hearing from you.

Very truly yours,

KENNETH R. JONES
Executive Officer
