Docket No. 50-323

ORDER RELATIVE TO SUSPENSION OF
DIABLO-MIDWAY NO. 3 TRANSMISSION LINE.

On January 11, 1974, the Applicant filed a Motion to Lift Suspension of Construction of the Diablo-Midway No. 3 Transmission Line. The work was suspended by Order of the Director of Regulation on February 4, 1972, pending the completion of the NEPA review. No response to the Motion was received from the Consolidated Intervenors nor from California but the Regulatory Staff filed an answer supporting the Motion on January 24, 1974.

This is a very serious matter since transmission line work crews will be released early in 1974, unless this work is resumed immediately. The Board has a responsibility under NEPA to make a cost-benefit balance and this determination can not be made until the evidentiary hearing on energy conservation, which challenges the need for power, has been concluded since it is the opinion of the Board that the

1974 L 1071 844 2

environmental impact of the transmission lines must be considered in the final cost-benefit balance. The Motion is denied.

The parties are put on notice that evidence on alternate sources of power which was received in September 1973, should be updated as well as the status of construction. The Board cannot emphasize too strongly that it is the best interests of all parties to proceed expeditiously with this proceeding and that a firm date will be set in the February 5, 1974 conference call.

IT IS SO ORDERED.

THE ATOMIC SAFETY AND
LICENSING BOARD

Elizabeth S. Bowers, Chairman

Issued at Washington, D. C.
this 29th day of January 1974.
