Atomic Energy Commission

Honorable Board:

I for one feel we should continue with our Pacific Gas & Electric Co.'s Diablo Canyon nuclear power unit project. For that matter I and many others feel we should develop several more units at this site.

The environmental groups have done a lot of good but they have also done a lot of harm.

If we continue to follow their recommendations there won't be anything left to protect.

The politicians in Washington say we are in a very critical energy crisis & I believe one way to help this condition is further development of nuclear power.

I am retired and spent better than 30 years with the Agricultural Department.

Sincerely,

Roger W. Allen DR-5538
