Nuclear Regulatory Commission - Clear of,  
Washington, D.C. 20555

Commissioners -

In relation to the proposed operation of the Nuclear-Power-Plant at Diablo Canyon, California I would like to share my feelings with you on this matter.

That plant is a potential deathly menace. Allowing a nuclear power plant to operate so near as  $2\frac{1}{2}$  miles from a major active geological fault is about like flying a kite during a thunderstorm and hoping to not get ZAPPED! ABSURD!

You may not have heard but last week the cooling tank in the plant malfunctioned during testing. You can be assured of plenty of public support for your action to deny the Diablo plant to operate. Or well see you on the other side of the Galaxy one day if you approve. This

Is a life and death matter  
to we who reside on the  
Central Coast of the great  
State of California.

For safe clean energy

Vincent A. Hill
