November 30, 2016

Mr. Wren Fowler
Director, Licensing
NAC International
3930 East Jones Bridge Road,
Suite 200
Norcross, GA 30092

SUBJECT: ISSUANCE OF CERTIFICATE OF COMPLIANCE NO. 1031, AMENDMENT
NO. 6 FOR THE MAGNASTOR® CASK SYSTEM (CAC NO. L25069)

Dear Mr. Fowler:

By your application dated December 11, 2015, NAC International submitted an application in accordance with Title 10 of the *Code of Federal Regulations* Part 72 for an amendment to Certificate of Compliance (CoC) No. 1031 for the MAGNASTOR® Cask System. Amendment No. 6 revises technical specifications (TS) to align the TS with the NAC-MPC and NAC-UMS TS. The CoC No. 1031 TS require that a program be established and maintained for loading, unloading, and preparing fuel for storage without any indication of duration for the program. Amendment No. 6 limits maintenance of this program until all spent fuel is removed from the spent fuel pool and transport operations are completed. Related training and radiation protection program requirements are modified accordingly. Additionally, Amendment No. 6 changes Limiting Condition for Operation (LCO) 3.1.1 previously approved by the NRC in Amendment No. 4.

The amendment, when codified through rulemaking, will be denoted as CoC No. 1031, Amendment No. 6.

As stated in the Federal Register (81 FR 69659, October 7, 2016), the effective date of this CoC Amendment is December 21, 2016. The NRC's safety evaluation report (SER) for this CoC (including Appendices A and B, TS) is enclosed. This certificate constitutes the approval and conditions for use of the MAGNASTOR® Cask System, Amendment No. 6 for storage of spent nuclear fuel under the general licensing provisions of 10 CFR 72.210.

W. Fowler
