

Facility: Dresden Station Date of Exam: 08/08/16 Scenario Numbers: ILT-N-1 / ILT-N-2 / ILT-N-3 Operating Test No.: 2016-301				
QUALITATIVE ATTRIBUTES		Initials		
		a	b*	c#
1.	The initial conditions are realistic, in that some equipment and/or instrumentation may be out of service, but it does not cue the operators into expected events.	C	BSP	BP
2.	The scenarios consist mostly of related events.	C	BSP	BP
3.	Each event description consists of <ul style="list-style-type: none"> the point in the scenario when it is to be initiated the malfunction(s) or conditions that are entered to initiate the event the symptoms/cues that will be visible to the crew the expected operator actions (by shift position) the event termination point (if applicable) 	C	BP	BP
4.	The events are valid with regard to physics and thermodynamics.	C	BSP	BP
5.	Sequencing and timing of events is reasonable, and allows the examination team to obtain complete evaluation results commensurate with the scenario objectives.	C	BSP	BP
6.	If time compression techniques are used, the scenario summary clearly so indicates. Operators have sufficient time to carry out expected activities without undue time constraints. Cues are given.	C	BSP	BP
7.	The simulator modeling is not altered.	C	BSP	GO
8.	The scenarios have been validated. Pursuant to 10 CFR 55.46(d), any open simulator performance deficiencies or deviations from the referenced plant have been evaluated to ensure that functional fidelity is maintained while running the planned scenarios.	C	BSP	BP
9.	Every operator will be evaluated using at least one new or significantly modified scenario. All other scenarios have been altered in accordance with Section D.5 of ES-301.	C	BSP	BP
10.	All individual operator competencies can be evaluated, as verified using Form ES-301-6 (submit the form along with the simulator scenarios).	C	BSP	BP
11.	The scenario set provides the opportunity for each applicant to be evaluated in each of the applicable rating factors. (Competency Rating factors as described on forms ES-303-1 and ES-303-3.)	C	BSP	BP
12.	Each applicant will be significantly involved in the minimum number of transients and events specified on Form ES-301-5 (submit the form with the simulator scenarios).	C	BSP	BP
13.	The level of difficulty is appropriate to support licensing decisions for each crew position.	C	BSP	BP
Target Quantitative Attributes (Per Scenario; See Section D.5.d)		Actual Attributes		
1.	Malfunctions after EOP entry (1-2)	2	1	2
2.	Abnormal events (2-4)	4	1	5
3.	Major transients (1-2)	2	1	2
4.	EOPs entered/requiring substantive actions (1-2)	1	1	2
5.	EOP contingencies requiring substantive actions (0-2)	1	1	1
6.	EOP based Critical tasks (2-3)	2	1	5
