Joseph Hendrie, Chairman
Nuclear Regulatory Commission
1717 H Street
Washington, D.C. 20555

Dear Mr. Hendrie:

Enclosed is a self-explanatory communication from my constituents, Mr. and Mrs. Leroy Saruwatari, in regard to their concerns over nuclear power.

I would very much appreciate any comments you may have on this matter.

Sincerely,

ROBERT J. LAGOMARSINO
Member of Congress

Enclosure

7-3-79

Congressman Bob Lagmarsino
1117 Longworth Building
Washington, D.C. 20515

Dear Congressman:

We sincerely believe that many individuals would not be so pro-nuclear power if they lived adjacent to a nuclear power plant as we do.

P.G.&E. has not answered some of the major unresolved health hazards created by plants such as these. P.G.&E. has not addressed the following questions regarding the emission of "white rain", radioactive dust, from their plant. We would like to know just how many pounds of radioactive dust Diablo would put into our air each day if it is turned on (1) under optimum operating conditions and (2) under the actual working conditions experienced by operating nuclear power plants -- within what limits and (3) what minerals the radioactive dust would contain.

The attitude of the utility companies and the Nuclear Regulatory Commission is to proceed with the operation of these plants with the "hope" of resolving any problems later -- just how much later is anyone's guess. Since many individuals don't worry about what they can't see or really understand, it is the grave responsibility of our representatives to expose all important information to the public to insure their safety, since the Nuclear Regulatory Commission has repeatedly failed in protecting the public's health and welfare. Thank you for your time.

Sincerely,
Mrs. Leroy Saruwatari
