

March 29, 1979  
Santa Cruz, Ca.

Dear NRC,

Just want to go on record with the host of others; Albert Einstein included among them, who fear that the terrors of nuclear technology far outweigh its merits. Please realize the magnitude of your personal responsibility. Please hear our concern with an open heart. Please act now to safe-guard our land against the use of nuclear reactors.

Thank you for your time & hopefully, for your efforts.

Sincerely,

*Gerry Smida*  
*Diana Leishman*

PS Please don't open the Diablo Reactor. After the recent breakdown in Pennsylvania, if you have any real concern for the human life in & around San Luis Obispo, it is inconceivable to me that you would allow Diablo to open.
