

3-2-81

DEAR MR. AHERNE,

I am unacceptably opposed to
your setting on your hands any
longer as concerns the operation
of the Diablo Canyon Unit #1
Nuclear generating plant. The nation
could be saving 20 million barrels of
oil per year and the consensus
of Technical Review agencies agree
the plants can be operated safely.
Two other plants of the same design
(Cohen II and North Anna II) have
been licensed since Three Mile
Island. I demand this bureaucratic
anti-nuke foot dragging stop and
Diablo Canyon be licensed.

Respectfully
Fred Brown
