Mr. John F. Ahern
Chairman, U.S. Nuclear Regulatory Comm.
1717 "H" St. N.W.
Washington, D.C. 20555

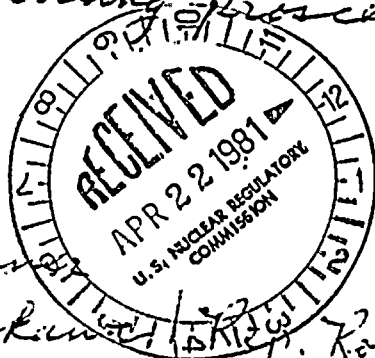

Dear Sir -

We are writing you to urge speedy licensing of the San Onofre and Diablo Canyon Nuclear Power plants. Calif. desperately needs the power from these plants. The Diablo Canyon plant alone could save Calif. 20 million barrels of oil per year and cut electric costs an estimated \$20 million/mo. The "environmentalist lobby" has, for the past 5 years, kept this plant from operating, thereby denying Californians the savings and benefits.

The San Onofre Nuclear plant, near us, already has Unit #1 in operation, and a speedy licensing of Units #2 and #3 (about 90% complete) will save about 100,000 barrels of oil per day. Again, please speed up this licensing process — Calif. needs the power!
