PROP. & UTIL. ENG.

Dear Sir,

I am a printer living in Santa Barbara and feel it is crucial for Diablo Canyon to be kept from operating before the public's concerns over safety due to the Hosgri Gault, plans for emergency in case of catastrophe, and the overall problem of waste disposal are carefully considered in a public setting.

Locally we are cutting back everywhere due to decreases in school age enrollment. It doesn't make sense to plan for increased power use when it's obvious we must all get used to cutting back our consumption.

Please be aware of my views and do the right thing accordingly - no license before satisfying the public's concerns on all issues of safety - it's our lives and we want them completely protected.

Sincerely,

Bill Brady
