Re: Diablo Canyon

Dear Mr. Hancatt,

It is my understanding there will be another meeting in San Luis Obispo on May 19, 1981 regarding a Low Power License for P. G. & E. concerning Diablo.

The majority of the people, I believe, have waited a long time for this plant to go into operation, it is my sincere hope you will do everything within your power to get this source of energy on line.

I do not have any relatives or family working for P. G. & E. and I own none of the company through any investments---they do furnish me power and I live approximately 10 miles from the plant.

Attached is a letter received yesterday (from the looks of it, I assume it is like a box-holder letter to everyone) from Mothers for Peace, signed by an Edie Clark, Treas. The last paragraph of this letter is most disturbing to me as I feel they intend to put on a show to indicate there is a vast majority against this plant---this is simply not true. This is sent to you in order that you be made aware.

Thank you very much for any help you can give to the people of California who want to be self sufficient in energy and not dependent upon imported fuel.

Thank you for your courtesy.

Respectfully,

E. W. DORITY
