RECEIVED
JUN 16 1981
U.S. NUCLEAR REGULATORY COMMISSION

I'm writing to demand that you refrain from licensing the Diablo Canyon plant. Enough information is available to make it strikingly clear that ~~the~~ Nuclear technology is leading to the irreversible destruction of life on the planet - You better put your expertise to the overwhelming task of undoing what has been done rather than continuing this epochal instance of criminal irresponsibility. What your perpetrating is worse than any ^{Nazi} death camp and you may as well know be aware that no rational can excuse the evil guilt you must live with. Atonement for this truly greatest of human sins by seeking to immediately phase out nuclear power.

I'm not a doomsayer - I'm facing our reality - If you fuckers don't change things quick we're going to see the most tragic global death ever.
