Re: Docket No. 50-275, OL-DPR-76
Diablo Canyon Unit No. 1
Future Changes in Technical
Specifications Due to
Verification Program

Dear Mr. Miraglia:

As a result of the PGandE and Independent Design Verification Programs, modifications to snubbers identified in the Technical Specifications (Appendix "A" to License No. DPR-76) may be required.

In an effort to reduce the number of Technical Specification change submittals that may result from any necessary snubber modifications, PGandE proposes to request only one such change at the conclusion of the verification programs, but prior to fuel loading and plant operation. The change request would document and justify those changes needed to reflect snubber modifications.

The appropriate PGandE organization will review and approve proposed modifications prior to implementation.

We request your concurrence with this method of handling modifications to snubbers identified in the Technical Specifications under these circumstances.

Very truly yours,

Philip A. Crane, Jr.
