Re: Docket No. 50-275, OL-DPR-76
Diablo Canyon Unit 1
Additional Information on Appendix R Review
Schedule for Fire Door Modifications

Dear Mr. Eisenhut:

In an October 11, 1983 letter, PGandE provided the schedule for completion of the modification of fire doors.

The following actions or combinations of actions are currently being considered as possible options for modifications of side panels and transoms which cannot meet UL approved configurations:

- (1) Install additional labeled rolling fire doors or double fire door assemblies to protect or replace the existing panels and transoms.
- (2) Replace or modify the existing panels and transoms with an approved configuration consistent with the fire rating of the barrier. This may require restructuring the panel assemblies with new frames and new panels.
- (3) Provide directional closed head sprinkler protection on both sides of the panels and transoms.
- (4) Utilize other approved fire resistive configurations complying with applicable portions of Appendix R Section III.G.

Kindly acknowledge receipt of this material on the enclosed copy of this letter and return it in the enclosed addressed envelope.

Sincerely,

J. O. Schuyler
