Re: Docket No. 50-275, OL-DPR-76
Diablo Canyon Unit 1
SSER 20 Followup Item 12

Dear Mr. Knighton:

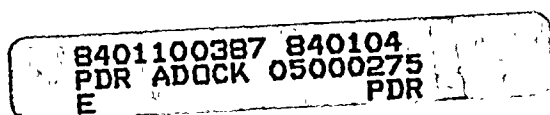

The NRC Staff conducted an audit of the Diablo Canyon environmental qualification files on December 19 and 20, 1983, to verify the qualification of equipment for revised environments. The Staff determined that the equipment is qualified for the revised environments; however, the Staff noted that documentation for equipment evaluation to the revised environments was incomplete. PGandE stated during the audit that the equipment environmental qualification files would be updated to complete this documentation.

The equipment environmental qualification files have been updated by PGandE to reflect the evaluation of equipment for revised environments at Diablo Canyon. Completion of the documentation fulfills the PGandE commitment identified in SSER 20 Followup Item 12.

Sincerely,

J. O. Schuyler
