During a recent staff review of Chapter 14 of the Diablo Canyon FSAR, we determined that the start-up program does not include a test for loss of offsite power with simultaneous loss of turbine generator. Such a test is prescribed by Regulatory Guide 1.68, "Initial Test Program for Water-Cooled Nuclear Power Plants," Appendix A.5.jj. The test is normally part of the initial test program to confirm equipment operability, to verify procedures, and to demonstrate operator training. We request that you include the test in your program or provide appropriate justification for not conducting the test.

Should you have any questions on this matter please contact Mr. H. Schierling, the Diablo Canyon Project Manager (301-492-7100).

Sincerely,

151

George W. Knighton, Chief
Licensing Branch No. 3
