Re: Docket No. 50-275, OL-DPR-80
Diablo Canyon Unit 1
Appendix R Additional Information - Ruskin Fire Damper

Dear Mr. Eisenhut:

PGandE is currently testing fire dampers with closure springs which were supplied by the Ruskin Manufacturing Company and which are installed in Diablo Canyon Unit 1. This testing is being done to evaluate possible closure problems under air flow conditions. These dampers were identified in a 10 CFR 21 report dated November 6, 1984 from Ruskin Manufacturing Company to the NRC. If it is determined that modifications are necessary, they will be of similar types as provided by Ruskin to correct the closure problems of the dampers at Palo Verde Unit 1.

Kindly acknowledge receipt of this material on the enclosed copy of this letter and return it in the enclosed addressed envelope.

Sincerely,

for J. D. Shiffer
