Dear Sir:

I am writing to urge you give rapid licensing of the San Onofre and Diablo Canyon Nuclear power plants. Once again I had a \$100<sup>00</sup> electric bill this winter. I tell you, more people have died in Teddy Kennedy's back seat than have died from nuclear power accidents. This vocal few ruling for those of us who pay and pay has got to come to an end. We here in Calif. are paying millions per month more than necessary because of a silly governor and a Kooky environmentalist lobby. Get on with it!

Thank you,
