Re: Docket No. 50-275, OL-DPR-76
Diablo Canyon Unit 1
BNL Request for Information

Dear Mr. Eisenhut:

In a letter dated January 26, 1983, the Staff requested information related to the seismic analyses of the Diablo Canyon power plant. Specifically, item 4 of that letter requested that any updates to the containment annulus structure be submitted as they become available. The following drawings reflect the latest status of the annulus steel structure design and are enclosed:

<u>Drawing No.</u>	<u>Revision No.</u>
SK 468987	01A
SK 468988	01A
SK 468989	01B
SK 468990	01A
SK 468991	01A

These drawings reflect vertical stiffening of the radial frames by the addition of columns and knee braces, and tangential beam stiffening modifications. Drawings documenting other modifications will be submitted once they are issued.

PDR

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

In the second section, the author outlines the various methods used to collect and analyze the data. This includes both manual and automated processes. The goal is to ensure that the information is both reliable and up-to-date.

The third part of the report details the results of the analysis. It shows a clear upward trend in the data over the period covered. This indicates that the current strategy is effective and that there is significant potential for further growth.

Finally, the document concludes with a series of recommendations for future actions. These include investing in new technology, expanding the market reach, and continuing to monitor the data closely. The author believes that these steps will lead to long-term success.

Mr. D. G. Eisenhut

April 13, 1983

Page 2

With concurrence by Mr. H. Schierling of the Staff, these drawings were provided to Brookhaven National Laboratory representatives on April 7, 1983, in San Francisco. Responses to other requests of the January 26, 1983, letter have been provided in previous submittals.

Very truly yours,

for Philip A. Crane, Jr.

Enclosure
