MEMORANDUM FOR: Chairman Palladino  
 Commissioner Roberts  
 Commissioner Asselstine  
 Commissioner Bernthal

FROM: William J. Dircks  
 Executive Director for Operations

SUBJECT: ACRS REVIEW OF DIABLO CANYON SSER

\*w/incoming

This memorandum is in response to Chairman Palladino's proposal that the staff set forth its plans regarding a review of the Diablo Canyon SSER by the ACRS.

The staff plans to complete by July 6, 1984, a draft SSER on the matter of piping and supports which is the subject of the seven technical license conditions in the NRR "Order Modifying License" of April 18, 1984. The draft report will be provided to the ACRS since members of the ACRS and its consultants have visited the plant - having earlier expressed an interest in further review. The staff recommends that this draft report be reviewed by the Committee with attendance by Task Force members.

At the same time we will provide the draft report to Mr. Isa Yin for his review and a request for his written comments. The staff will issue its final report to reflect the comments by the ACRS and Mr. Yin, as appropriate. In addition, we will include both comments as an appendix in the final SSER as is our normal practice. We expect to issue the final SSER within three working days after receipt of the comments. Enclosure 1 is a draft memorandum from you to ACRS requesting that they undertake an expedited review.

I would note that in addition to the SSER on the matter of piping and supports we intend to issue a second SSER on the resolution of remaining full power IDVP items and a third SSER to address the resolution of any allegation that the staff determined must be resolved prior to Unit 1 exceeding 5% power. Both of these SSERs are currently scheduled to be completed by about July 13, 1984.

Enclosure 2 is a schedule for plants with very short term potential for licensing. The schedule includes Diablo Canyon.

(Signed) William J. Dircks

ENCLOSURE 1  
DRAFT

MEMORANDUM FOR: Dr. Jesse Ebersole  
Chairman, ACRS

FROM: Chairman Palladino

SUBJECT: REVIEW OF DIABLO CANYON ISSUES

Due to the differences in technical opinion within the staff on piping and support issues at Diablo Canyon, the Commission would like ACRS to review the draft SSER. I understand that staff will be available to discuss the issues with you at your call. I am very anxious to have ACRS address this item in order that the Commission can have the advantage of your views by July 23, 1984.

Nunzio J. Palladino  
Chairman

DRAFT

ENCLOSURE 2

NEAR TERM SCHEDULES

GRAND GULF

- Week of 7/2: Ultimate Heat Sink mods complete; plant can then restart to 5%.
- About July 6: Diesel (reassembled) declared "operable" (GDC 17 exemption being reviewed - June 22 RAI sent to utility).
- Week of 7/23: All Tech Specs corrections and Full Power license ready for sending to Commission.
- Week of 7/23: Staff review complete of diesel inspections (report due week of 7/2)
- July 24: Possible Udall hearing.
- Week of 7/30: Commission meeting for full power.

DIABLO CANYON

- By July 6: All technical inputs to DL.
- By July 6: Issue draft "piping and supports" report to ACRS.
- July 12-13: ACRS Meeting.
- July 13: Staff issues remaining SSERs.
- July 17: Staff sends Full Power license to Commission
- Week of 7/23: Commission Meeting.

CALLAWAY

- June 11, 1984: Low Power License Issued
- Aug. 17, 1984: Utility projects ready for Full Power (Initial Criticality - July 15)
- Week of 8/5: Commission Meeting

16 A 2003
