SUBJECT: DIABLO CANYON UNIT 1 TRIP REPORT - MEETING SUMMARY -
SEPTEMBER 6 AND 7, 1983

On September 6, 1983 members of the NRC staff toured the Diablo Canyon, Unit 1 facility under guidance of the Diablo Canyon NRC Senior Resident Inspector. The group was accompanied by representatives of the Diablo Canyon Project. A list of participants in the plant tour is attached. The group viewed modifications made as a result of the verification program to Unit 1 structures, systems and components including the following specific items:

- . main control board cabinets in control room
- . columns and beams in annulus steel structure including connections
- . polar crane inside containment
- . pipe supports
- . electrical raceway supports
- . fuel handling building superstructure
- . turbine building modifications
- . diesel generator air intake and exhaust
- . rupture restraints in auxiliary building

On September 7, 1983 the NRC group meet with representatives from PG&E at the PG&E Energy Center near the Diablo Canyon site. A summary of the meeting was prepared by P. Morrill of NRC Region V and is attached.
