**Subject:** [External\_Sender] RE: Fort Riley Range 18 A, B, C and Range 19 A & B  
**Date:** Tuesday, May 24, 2016 11:17:47 AM

---

Walter,

You are correct. Only 27A/27B and 29 are the RCAs at Fort Riley.

License condition 11 refers to "Maps of the locations of the RCAs, "M101 Impact Areas," dated December 31, 2015 (but, sent February 12, 2016, (ML16048A358)." The map for Fort Riley in that document shows only 27A/27B and 29 and that map in that document is what counts.

Remember that I had some confusion over the RCAs at Fort Riley that we eventually cleared up. Apparently that confusion caused the NRC to mislabel 18 and 19 as RCAs in the SER. The NRC probably wrote that part of the SER before we cleared up the confusion and then missed making the correction later.

The license is what really matters, though, and it is correct. Thanks for noticing the mistake in the SER. I had missed it. I will let the NRC know about this, too, in case they want to modify the SER accordingly.

**Subject:** Fort Riley Range 18 A, B, C and Range 19 A & B

Greeting Dr. Cherry,

Hopefully everything is going alright.

I know you have been tiredly working on this project and a job well done. Once you get some time, can you please review the Safety Evaluation Report for the U.S. Army's Possession License for Depleted Uranium from Davy Crockett M101 Spotting Rounds - Amendment to Add Remaining Sites Docket No. 040-09083; Table 1, located in the Location and

No. of Sites with DU on page 16.

For clarification and to ensure that we are following the guidelines/instructions: Ranges 18 & 19 has not been designated as a RCA and does not requires any caution signs. But, they are listed in Table 1, and the final CoE report stated on page 3: No documents were found, to confirm the use of the weapon system being fired on these ranges.

Any information is always appreciated and helpful.

Thanks

v/r

Walter
