1. The first part of the document is a list of names and addresses, which are arranged in a table-like format. The names are listed in the first column, and the addresses are listed in the second column. The names are: John Doe, Jane Smith, and Bob Johnson. The addresses are: 123 Main St, 456 Elm St, and 789 Oak St.

2. The second part of the document is a list of names and addresses, which are arranged in a table-like format. The names are listed in the first column, and the addresses are listed in the second column. The names are: John Doe, Jane Smith, and Bob Johnson. The addresses are: 123 Main St, 456 Elm St, and 789 Oak St.

3. The third part of the document is a list of names and addresses, which are arranged in a table-like format. The names are listed in the first column, and the addresses are listed in the second column. The names are: John Doe, Jane Smith, and Bob Johnson. The addresses are: 123 Main St, 456 Elm St, and 789 Oak St.

4. The fourth part of the document is a list of names and addresses, which are arranged in a table-like format. The names are listed in the first column, and the addresses are listed in the second column. The names are: John Doe, Jane Smith, and Bob Johnson. The addresses are: 123 Main St, 456 Elm St, and 789 Oak St.

5. The fifth part of the document is a list of names and addresses, which are arranged in a table-like format. The names are listed in the first column, and the addresses are listed in the second column. The names are: John Doe, Jane Smith, and Bob Johnson. The addresses are: 123 Main St, 456 Elm St, and 789 Oak St.

6. The sixth part of the document is a list of names and addresses, which are arranged in a table-like format. The names are listed in the first column, and the addresses are listed in the second column. The names are: John Doe, Jane Smith, and Bob Johnson. The addresses are: 123 Main St, 456 Elm St, and 789 Oak St.

Dear Mr. Denton,

I am sure that you are well aware of the great controversy brewing on the nuclear power issue and I sincerely hope that the problem is resolved before there is another nuclear accident. however, I sadly feel that it won't. When a serious accident does occur, it is going to be a terrible thing to bear on our conscience.

Mr. Denton, I am appealing to you on this special matter because I feel that you are capable of making a decision based on moral judgment and not on economic impact. Please don't take this lightly. there are many of us who are living with a great amount of fear and anxiety because of our unfortunate location.

Somehow our local utility company, pacific Gas & Electric was able to obtain a construction permit to build a power plant at Diablo Canyon in central California. Very early in construction it was learned that there was a large active earthquake fault lying to sea about 2½ miles from the construction site. This information was ignored by the utility. Last year seismic hearings were held by the N.R.C. for the licensing of the plant. The hearings in no way resembled the legal process that we have grown to know in our American system. They read more like a kangaroo court in Uganda. I hope that you will take the time to review the proceedings of those hearings.

There are many geologists who feel that we are entering a period of high earthquake activity here in California. We just had one two days ago measuring 5.9, and today measuring 4.5. It is very Frightening to think of the consequences of a substantial earthquake or tsunamis on that plant. It should be frightening

1. The first part of the report is a summary of the work done during the year.

2. The second part is a detailed account of the experiments carried out.

3. The third part is a discussion of the results obtained and their significance.

4. The fourth part is a conclusion drawn from the work done.

5. The fifth part is a list of references to the work of other workers in the field.

6. The sixth part is a list of the apparatus and materials used in the experiments.

7. The seventh part is a list of the names of the workers who have contributed to the work.

8. The eighth part is a list of the names of the workers who have assisted in the work.

9. The ninth part is a list of the names of the workers who have been responsible for the work.

10. The tenth part is a list of the names of the workers who have been responsible for the work.

11. The eleventh part is a list of the names of the workers who have been responsible for the work.

12. The twelfth part is a list of the names of the workers who have been responsible for the work.

13. The thirteenth part is a list of the names of the workers who have been responsible for the work.

14. The fourteenth part is a list of the names of the workers who have been responsible for the work.

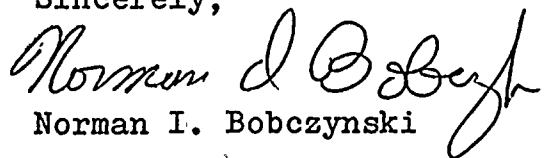

to those people on whose shoulders the decision falls to issue the license. To date, it seems that those persons are totally oblivious to that moral consideration.

Pacific Gas & Electric has over 1.5 billion dollars invested in that plant. That is a huge sum of money. The question now arises; Which is more important? the health and safety of a community or the non acceptance of a huge financial mistake. I hope that I am not being naive in thinking that there are still people who would not succumb to the financial or political threat that this decision would incur.

Mr. Denton, please think this matter over very carefully. That plant should not be licensed. It has already cost over 1.5 billion dollars, please don't let the cost go beyond money. Those of us that are living just downwind the plant are appealing to your better judgment.

Thank you for your consideration. I would appreciate a reply at your earliest convenience.

Sincerely,

  
Norman I. Bobczynski

In the Matter of  
PACIFIC GAS AND ELECTRIC COMPANY  
(Diablo Canyon Nuclear Power Plant, Units Nos. 1 and 2)  
Docket Nos. 50-275 O.L. & 50-323 O.L.

Dear David:

This letter is in response to your request of July 13, 1979 to Mr. Tourtellotte that PG&E and the NRC Staff serve Gordon and Sandy Silver individually with all copies of Diablo Canyon pleadings.

As you can see by the enclosed Staff Licensing and Appeal Board service lists, we currently do serve both Gordon and Sandra individually. You'll have to discuss the matter of PG&E service with Messrs. Crane and Norton.

Sincerely,

L. Dow Davis  
Counsel for NRC Staff

Joseph Hendrie, Chairman  
Nuclear Regulatory Commission  
1717 H Street  
Washington, D.C. 20555

Dear Mr. Hendrie:

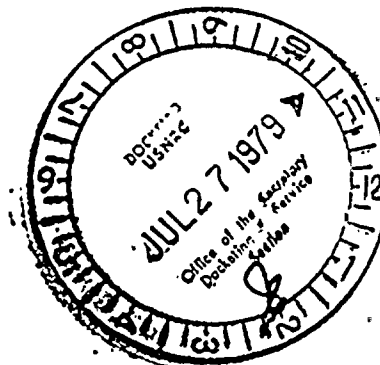

Enclosed is a self-explanatory communication from my constituents, Mr. and Mrs. Leroy Saruwatari, in regard to their concerns over nuclear power.

I would very much appreciate any comments you may have on this matter.

Sincerely,

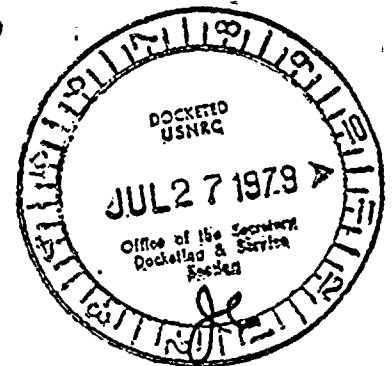

ROBERT J. LAGOMARSINO  
Member of Congress

Congressman Bob Lagmarsino  
1117 Longworth Building  
Washington, D.C. 20515

Dear Congressman:

We sincerely believe that many individuals would not be so pro-nuclear power if they lived adjacent to a nuclear power plant as we do.

P.G.&E. has not answered some of the major unresolved health hazards created by plants such as these. P.G.&E. has not addressed the following questions regarding the emission of "white rain", radioactive dust, from their plant. We would like to know just how many pounds of radioactive dust Diablo would put into our air each day if it is turned on (1) under optimum operating conditions and (2) under the actual working conditions experienced by operating nuclear power plants -- within what limits and (3) what minerals the radioactive dust would contain.

The attitude of the utility companies and the Nuclear Regulatory Commission is to proceed with the operation of these plants with the "hope" of resolving any problems later -- just how much later is anyone's guess. Since many individuals don't worry about what they can't see or really understand, it is the grave responsibility of our representatives to expose all important information to the public to insure their safety, since the Nuclear Regulatory Commission has repeatedly failed in protecting the public's health and welfare. Thank you for your time.

Sincerely,  
*Mr. & Mrs. Leroy Saruwatari*
