PGandE Letter No.: DCL-85-066

Mr. George W. Knighton, Chief
Licensing Branch No. 3
Division of Licensing
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Re: Docket No. 50-323
Diablo Canyon Unit 2
Inspection of Mechanical Snubbers

Dear Mr. Knighton:

During the NRC Staff Unit 2 piping audit conducted January 14-17, 1985, the Staff commented on PGandE's Temporary Procedure TP TD-8402, "Visual Inspection of Mechanical Snubbers," which was provided in PGandE letter DCL-84-390, dated December 28, 1984. Specifically, in the letter to PGandE dated January 31, 1985 (Attachment 3, Item 6), the Staff noted the procedure "...neglected to supply requirements for the snubber 'as-installed', including the connections to the supporting structure and the supported component."

Temporary Procedure TP TD-8402 was approved by PGandE and issued in April 1984 to comply with and satisfy the visual examination and operability test requirements of IE Bulletin No. 81-01. The Staff's concerns about other components associated with safety-related snubbers will be addressed in the Unit 2 Technical Specifications, Section 3/4.7.7, "Snubbers, Surveillance Requirements." The visual inspection acceptance criteria specifically address snubber operability, attachments to the foundation or supporting structures, and fasteners for attachment of the snubber to the component and to the snubber anchorage. The Technical Specification requirements will be implemented through Surveillance Test Procedure, STP M-78A, "Snubber Visual Inspection," which is enclosed.

The Unit 2 snubber surveillance and testing program required by IE Bulletin No. 81-01 is scheduled to begin mid-February and will be complete by the end of March 1985. In accordance with the bulletin, a final report, signed under
