Re: Docket No. 50-275, OL-DPR-80
Docket No. 50-323, OL-DPR-81
Diablo Canyon Units 1 and 2
NRC Contingency Telecommunications

Dear Mr. Martin:

NRC Region V's letter dated June 20, 1985 regarding contingency telecommunications at Diablo Canyon made two requests of PGandE. These were: 1) a request for formal permission to place temporary repeater stations on top of Davis Peak and Black Butte; and 2) a request for a cost estimate to install additional telephone circuits in the EOF for NRC use.

A formal agreement between PGandE and the NRC will be required for NRC to place temporary repeaters in the PGandE radio vaults on Davis Peak and Black Butte. PGandE foresees no problem in executing the agreement, although additional information will be required. This required information consists of the radio frequencies to be used, the number of radios and antennas per site, the type of radios and the power requirements. Once this information has been received and analyzed, PGandE can process the necessary agreement.

The cost estimate for installation of additional NRC telephone circuits in the EOF is \$50 for materials and \$250 for labor. This covers the establishment of three new two-wire telephone circuits, termination of the circuit ends with NRC supplied WE-742 connectors, and tagging of the circuits.

Should you have additional questions, please contact E. R. Kendle at 768-4848.

Kindly acknowledge receipt of this material on the enclosed copy of this letter and return it in the enclosed addressed envelope.

Sincerely,

[Signature]
for J. D. Shiffer
