Mr. J. D. Shiffer, Vice President
Nuclear Power Generation
c/o Nuclear Power Generation, Licensing
Pacific Gas and Electric Company
77 Beale Street, Room 1451
San Francisco, California 94106

Dear Mr. Shiffer:

SUBJECT: FURTHER PLANT-SPECIFIC ACTION NOT REQUIRED FOR NRC BULLETIN 87-01,
"THINNING OF PIPE WALLS AT NUCLEAR POWER PLANTS"
(TAC NOS. 67432 AND 67433)

On July 9, 1987, NRC Bulletin 87-01 was issued to all licensees. This bulletin requested that licensees submit information concerning their programs for monitoring the thickness of pipe walls in high-energy single-phase and two-phase carbon steel piping systems. PG&E provided its response to the bulletin in a letter dated September 8, 1987.

The information that you provided is being used to determine the extent of industry participation and implementation of erosion/corrosion inspection programs, and to obtain data on observed pipe wall thinning. The staff does not plan to determine the adequacy or the acceptability of your current program at this time. Therefore, no further plant-specific action with respect to NRCB 87-01 is required.

You will be notified should there be any future action required regarding pipe wall thinning. This completes staff efforts on TAC Nos. 67432 and 67433.

Sincerely,
original signed by

Harry Rood, Senior Project Manager
Project Directorate V
Division of Reactor Projects III,
IV, V and Special Projects
