

MAY 3 1988

Docket Nos. 50-275 and 50-323

Pacific Gas and Electric Company
77 Beale Street, Room 1451
San Francisco, California 94106

Attention: Mr. J. D. Shiffer, Vice President
Nuclear Power Generation

SP-14

Gentlemen:

Subject: April 26, 1988, Management Meeting

This refers to the management meeting held with Mr. Maneatis, yourself and members of your staff at the Diablo Canyon Site on April 26, 1988. A number of topics were discussed in the meeting and are summarized in the enclosed report. In summary, performance in a number of problem areas identified last year has improved. However, recent events and inspector findings at Diablo Canyon indicate additional attention is needed to provide additional assurance that your expectations for performance are understood and implemented by all plant personnel. Specific problem areas include individuals proceeding with work in the face of uncertainty; performing work not specified by, or without, a procedure; and foreign material exclusion practices.

In addition, discussion focused on two concerns areas which have been problems at other Region V facilities: maintenance backlog and configuration management. As our discussion indicated, the maintenance backlog does not appear to be well understood by plant management. Although improvements have been made in tracking backlog, the scope of the backlog and length of time required to complete a task did not appear to be well understood. With regard to configuration management, pending a more detailed assessment, it appears that you have initiated such a program. We are interested in your assessment and progress in these areas and look forward to future discussions.

In accordance with 10 CFR 2.790 (a), a copy of this letter and the enclosures will be placed in the NRC Public Document Room.

Sincerely,

Original signed by,
Dennis Fiskirsich, Director
Division of Reactor Safety and
Projects
