Re: Docket No. 50-275, OL-DPR-80
Docket No. 50-323, OL-DPR-82
Diablo Canyon Units 1 and 2
License Amendment Request 88-10
Undervoltage Trip and Shunt Trip Attachments Testing

Gentlemen:

Enclosure 1 is an application for an amendment to Facility Operating License Nos. DPR-80 and DPR-82. This license amendment request (LAR) proposes to revise the Diablo Canyon Technical Specifications to incorporate the undervoltage trip and shunt trip attachments testing recommended by WCAP-11312, "Reactor Trip Breaker Maintenance/Surveillance Optimization Program," for compliance with Generic Letter 85-09.

While the changes proposed in the enclosed LAR will provide additional assurance that the plant will respond to trip signals as needed, PG&E believes the priority for review and approval of this request by the NRC is medium to low, as the proposed changes are not required to address an immediate safety concern.

PG&E letter DCL-85-360, dated December 6, 1985, provided PG&E's initial response to Generic Letter 85-09. In that letter, PG&E proposed that surveillance test requirements and allowable outage times recommended in Generic Letter 85-09 should be administratively controlled until the requirements could be optimally determined by the trip breaker reliability model being developed by the Westinghouse Owners Group (WOG).

Based on the WOG recommendations previously submitted to the NRC in DCL-85-360, PG&E concludes that inclusion of bypass breaker testing into the Diablo Canyon Technical Specifications is not required, and plans to administratively control the bypass breaker testing outside of the technical specifications. justification for not including bypass breaker testing in the Diablo Canyon Technical Specifications is provided in Enclosure 2.

Pursuant to 10 CFR 170.12(c), an application fee of \$150.00 is enclosed.

Kindly acknowledge receipt of this material on the enclosed copy of this letter and return it in the enclosed addressed envelope.

Sincerely,

J. D. Shiffer
