Docket Nos. 50-275 and 50-323

Pacific Gas and Electric Company
77 Beale Street, Room 1451
San Francisco, California 94106

Attention: Mr. J. D. Shiffer, Vice President
Nuclear Power Generation

Gentlemen:

Subject: NRC Inspection of Diablo Canyon Units 1 and 2 - EA 89-85

This refers to a special inspection conducted by Messrs. P. P. Narbut and K. E. Johnston during the period of January 23 through March 17, 1989. Additionally, this report includes the results of a meeting held in the NRC Region V Offices in Walnut Creek, California on April 6, 1989. This inspection examined your activities as authorized by NRC License Nos. DPR-80 and DPR-82. At the conclusion of the inspection, discussions of our findings were held with you and other members of your staff.

The inspection included an examination of multiple problems involving the inoperability of the Auxiliary Feedwater System experienced in December 1988 through February 1989. Additionally, this report includes an evaluation of your Licensee Event Reports written in response to the NRC findings pursuant to a special team inspection, as reported in NRC inspection report 50-275/89-01.

The specific areas examined during this inspection are described in the enclosed inspection report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspectors.

Based on the results of this inspection, it appears that certain of your activities were not conducted in full compliance with NRC requirements. These violations have reinforced our concerns related to design basis maintenance and engineering work. Additionally, the adequacy of management and quality organization followup and corrective actions has been identified as a potential continuing problem area from these inspection results. Enforcement related to these matters will be the subject of separate correspondence.

In accordance with 10 CFR 2.790 (a), a copy of this letter and the enclosure will be placed in the NRC Public Document Room.
