Re: Docket No. 50-275, OL-DPR-80
Docket No. 50-323, OL-DPR-82
Diablo Canyon Units 1 and 2
License Amendment Request 91-01
Revision of Technical Specification 4.6.2.3 -
Revise Requirement to Verify Containment Fan Cooler Unit Dampers
Transfer From the Normal to the Accident Position

Gentlemen:

Enclosed is an application for amendment to Facility Operating License Nos. DPR-80 and DPR-82. The enclosed license amendment request (LAR) proposes a change to Technical Specification 3/4.6.2.3 "Containment Cooling System," and Bases 3/4.3.1 and 3/4.3.2, to revise the requirement that the containment fan cooler unit (CFCU) dampers transfer from the normal to the accident position when tested in accordance with Surveillance Requirement 4.6.2.3a.3).

This LAR is not required to address an immediate safety concern. PG&E currently plans to simplify the design and operation of the CFCUs by eliminating some of the active components during the fourth refueling outage for Unit 2 and the fifth refueling outage for Unit 1. Therefore, PG&E desires to have the proposed change approved before the fourth refueling outage for Unit 2, which is scheduled to begin on September 15, 1991. PG&E requests that the license amendment be made effective immediately upon issuance.

Sincerely,

A handwritten signature in cursive script, appearing to read 'J. D. Shiffer'.

J. D. Shiffer
