Docket Nos. 50-275 and 50-323

Pacific Gas and Electric Company
77 Beale Street, Room 1451
San Francisco, California 94106

Attention: Mr. J. D. Shiffer, Senior Vice President and General Manager
Nuclear Power Generation Business Unit

Gentlemen:

Subject: Final Systematic Assessment of Licensee Performance (SALP) Report
and Management Meeting Minutes

This refers to the management meeting held with Mr. Maneatis, yourself, and members of your staff at the Diablo Canyon Power Plant on August 27, 1991. Subjects discussed during the meeting are summarized in the enclosed meeting report. In summary, the meeting focused on the August 14, 1991, Diablo Canyon Systematic Assessment of Licensee Performance (SALP) report.

As discussed in our August 14, 1991 letter, in the initial SALP Report transmitted by that letter, and during our August 27 meeting, the SALP board found your overall performance to be very good, in some cases superior, and clearly directed toward safe facility operation. Specific strong performance was noted in the Plant Operations, Radiological Controls, Engineering/Technical Support, and Safety Assessment/Quality Verification functional areas. During our meeting you identified areas to which you plan to give continuing management attention in order to realize long term, high quality performance in all of the functional areas. We strongly support these ongoing improvement initiatives.

No response to this letter is required. Further, we note that you made no comments in our meeting which would require revision of the SALP report and you stated that a written response would not be submitted; therefore, the SALP report as issued on August 14, 1991, is considered to be the final SALP report.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosure will be placed in the NRC Public Document Room.

Should you have any questions regarding this letter or the enclosed meeting report, we will be pleased to discuss them with you.

Sincerely,

J. B. Martin
Regional Administrator
