Re: Docket No. 50-275, OL-DPR-80
Docket No. 50-323, OL-DPR-82
Diablo Canyon Units 1 and 2
Response to August 23, 1991 NRC Letter Regarding PG&E's Purchase
and Dedication of An Additional Emergency Diesel Generator

Gentlemen:

NRC letter dated August 23, 1991, summarized a July 15, 1991, meeting between PG&E and the NRC Staff regarding PG&E's purchase and dedication of a commercial-grade Emergency Diesel Generator (EDG) for installation as a sixth safety-related EDG at Diablo Canyon Power Plant. The NRC noted in the letter that PG&E agreed to provide additional information related to meeting Agenda Items Q2 and Q3. PG&E had planned to incorporate information regarding these two agenda items into the Replacement Parts Evaluation (RPE) that PG&E has prepared in order to document the dedication of the commercial grade EDG as safety-related. PG&E had understood that the NRC Staff would review this information in the next inspection phase of the sixth EDG.

Subsequent discussions between PG&E and the NRC Staff on September 19 and September 25, 1991, have confirmed that this approach is acceptable to the NRC. Accordingly, PG&E is incorporating the requested information into the RPE, which will be available for NRC review during the next NRC inspection phase of PG&E's purchase and dedication of the EDG.

Sincerely,

James D. Shiffer
