License Amendment Request 92-06  
Revision of Technical Specification 3/4.8.4 - Relocation of  
"Motor-Operated Valves Thermal Overload Protection and Bypass  
Devices" Table (Generic Letter 91-08)

Gentlemen:

Enclosed is an application for amendment to Facility Operating License Nos. DPR-80 and DPR-82. The enclosed license amendment request (LAR) proposes to revise Technical Specification (TS) 3/4.8.4 by relocating TS Table 3.8-1, "Motor-Operated Valves Thermal Overload Protection and Bypass Devices," to Diablo Canyon Power Plant procedures in accordance with the guidance provided in Generic Letter 91-08, "Removal of Component Lists from Technical Specifications," dated May 6, 1991.

Since the change proposed in this LAR is not required to address an immediate safety concern, PG&E believes that the NRC review and approval of this LAR should be of low priority. Due to the time required for plant procedure revision and approval resulting from this change, PG&E requests that the NRC make the TS change effective 30 days from the issuance of the license amendment.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Greg. Rueger'.
