Attention: Mr. G. M. Rueger, Senior Vice President and General Manager
Nuclear Power Generation Business Unit

Subject: NOTICE OF VIOLATION
NRC INSPECTION REPORT NOS. 50-275/93-24 AND 50-323/93-24

This refers to the routine inspection conducted by M. Miller, D. Kirsch and M. Tschiltz during the period from August 18 through September 28, 1993. This inspection examined your activities as authorized by NRC License Nos. DPR-80 and DPR-82. At the conclusion of the inspection, the inspectors discussed their findings with members of the PG&E staff.

Areas examined during this inspection are described in the enclosed inspection report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspectors.

Based on the results of this inspection, it appears that certain of your activities were not conducted in full compliance with NRC requirements, as set forth in the enclosed Notice of Violation (Notice), and in the enclosed inspection report. This violation involved a temporary gage which was installed in the Unit 2 component cooling water (CCW) system without appropriate documentation or safety analysis. A non-cited violation was also noted regarding the same gage, in that it had been installed and removed at an earlier date using improper administrative controls. This deficiency was identified by a system engineer, as discussed in Paragraph 8 of the enclosed report. Since the criteria of the NRC Enforcement Policy were satisfied, this violation was not cited.

You are required to respond to this letter and should follow the instructions specified in the enclosed Notice when preparing your response. In your response, you should document the specific actions taken and any additional actions you plan to prevent recurrence. After reviewing your response to this Notice, including your proposed corrective actions and the results of future inspection, the NRC will determine whether further NRC enforcement action is necessary to ensure compliance with NRC regulatory requirements.

In accordance with 10 CFR 2.790(a), a copy of this letter, the enclosures, and your response will be placed in the NRC Public Document Room.

The response directed by this letter and the accompanying Notice is not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, Pub. L. 96-511.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

C. A. VanDenburgh, Chief
Reactor Projects Branch
