Docket No. 50-323, OL-DPR-82
Diablo Canyon Units 1 and 2
Quality Assurance Program for a Diablo Canyon Power Plant Independent Spent
Fuel Storage Installation

Dear Mr. Paperiello:

Pursuant to 10 CFR 72.140(d), Pacific Gas and Electric Company (PG&E) hereby notifies the NRC of its intent to apply the Diablo Canyon Nuclear Power Plant (DCPP) 10 CFR 50, Appendix B, Quality Assurance (QA) Program to activities related to the development of an Independent Spent Fuel Storage Installation (ISFSI) at DCPP. The DCPP Appendix B QA Program is described in Chapter 17 of the DCPP Final Safety Analysis Report (FSAR) Update. 111

The DCPP QA Program was first submitted as a part of the original FSAR in 1973 and was approved for use during plant operations in Supplemental Safety Evaluation Report No. 9, issued in June 1980. The latest docketed version of the program is contained in Revision 12 of the FSAR Update, submitted to the NRC in PG&E Letter DCL-98-135, dated September 28, 1998. Pory

PG&E currently plans to submit an updated QA Program that includes appropriate ISFSI requirements as a part of the DCPP ISFSI License Application to allow the NRC to review the program for compliance with 10 CFR 72, Subpart G. The license application is scheduled for submittal to the NRC in mid 2000.

Any questions related to this submittal should be directed to Mr. Terence Grebel, Director, Regulatory Services, at (805) 545-4720 or Mr. Roger Johnson at (415) 973-1784.
