Correction to Semi-Annual Fitness for Duty Performance Report for January through
June 1999

Dear Commissioners and Staff:

The purpose of this letter is to correct an error in the Semiannual Fitness for Duty Report for January through June 1999. The report was sent via PG&E Letter DCL-99-114, dated August 30, 1999. Attachment 2 of the report indicated that the overall positive test rate was 1.43 percent. The correct overall positive test rate is 1.61 percent. The corrected page for the report is attached and bold print and a revision bar indicate the change.

If you have any questions regarding this information or other FFD Program activities, please contact William F. Ryan, Access/FFD Supervisor, at (805) 545-3329.

Sincerely,

David H. Oatley

**STATISTICAL ANALYSIS FOR REPORTING PERIOD
JANUARY THROUGH JUNE 1999**

Analysis of the data indicates that 25.7 percent of the average eligible population was randomly tested from January through June 1999.

The random positive rate for all workers at DCCP from January through June 1999 was 0.74 percent. The licensee employee random positive test rate was 0.79 percent. Contractor employee random positive rate was 0.64 percent.

The overall positive test rate was 1.61 percent. Preaccess tests for short term contractor personnel accounted for 83.3 percent of all positive tests. The large number of positive tests recorded for short term contractor personnel in the preaccess testing category is attributable to the 1R9 refueling outage.

PG&E submitted blind performance specimens in accordance with 10CFR26, Appendix A, Section 2.8.(e)(2), requirements. There were no reportable events.
