Diablo Canyon Units 1 and 2
Additional Information Regarding
License Amendment Request 89-06
Deletion of Technical Specifications 3/4.5.4, Boron Injection System, and Associated Bases, and Revision of Technical Specification Tables 3.3-5, Engineered Safety Features Response Times, and 3.8-1, Motor-Operated Valves Thermal Overload Protection and Bypass Devices

Gentlemen:

PG&E Letter DCL-89-132, dated May 15, 1989, submitted License Amendment Request (LAR) 89-06 proposing deletion of Technical Specifications (TS) associated with the Boron Injection Tank (BIT) and revision of several related TS. One of the administrative changes identified in LAR 89-06 involved changing the function of the BIT inlet and outlet valves to charging injection valves in TS Table 3.8-1. Similar administrative changes are also necessary for the three valves in TS Table 3.6-1, as shown in the enclosure.

PG&E requests that the additional changes proposed in the enclosure be included with the Marked-Up Technical Specifications (Attachment B) in LAR 89-06.

Kindly acknowledge receipt of this material on the enclosed copy of this letter and return it in the enclosed addressed envelope.

Subscribed to in San Francisco, California this 3rd day of July 1989.

Respectfully submitted,

Pacific Gas and Electric Company
