Re: Docket No. 50-275, OL-DPR-80  
Docket No. 50-323, OL-DPR-82  
Diablo Canyon Units 1 and 2  
License Amendment Request 90-14  
Addition of Technical Specification 3/4.7.1.6 for the Main  
Feedwater Regulating Valves, Bypass Valves and Isolation Valves;  
Increased Main Feedwater Regulating Valve and Bypass Valve  
Closure Time Limit

Gentlemen:

This is an application for amendment to Facility Operating License Nos. DPR-80 and DPR-82. The enclosed license amendment request (LAR) proposes to add new Technical Specification (TS) 3/4.7.1.6, "Main Feedwater Regulating, Bypass and Isolation Valves", to the Diablo Canyon Power Plant (DCPP) TS. This LAR also proposes to increase the Main Feedwater Regulating Valve and Bypass Valve closure time limit from 5 seconds to 7 seconds.

The changes proposed in this LAR will result in improved control of the DCPP Main Feedwater Systems without the implementation of design or hardware changes and will provide clarification concerning the Applicability and Action for an inoperable Main Feedwater System valve. The proposed TS changes are not required to address an immediate safety concern. Therefore, PG&E believes the NRC priority for review should be medium. PG&E requests the proposed changes be made effective immediately following issuance of a license amendment by the NRC.

Sincerely,

A handwritten signature in black ink, appearing to read 'J. D. Shiffer'. The signature is fluid and cursive, with a large initial 'J' and 'S'.

J. D. Shiffer
