Re: Docket No. 50-323, OL-DPR-82
Diablo Canyon Unit 2
Evaluation of Indications in Accumulator Tanks

Gentlemen:

As discussed in PG&E Letter No. DCL-93-093, dated April 19, 1993, PG&E hereby transmits additional information regarding an evaluation of indications in the Diablo Canyon Unit 2 accumulator tanks. The indications were discovered during the Unit 2 fifth refueling outage by nondestructive examination.

The indications have been evaluated in accordance with ASME Section XI, 1977 edition through the summer 1978 addenda, paragraph IWB-3122.4. The evaluation shows that the indications meet the acceptance criteria of IWB-3600. As required by IWB-3122.4, the areas containing the indications will be reexamined in accordance with IWC-2420, "Successive Inspections."

PG&E will inspect the most severe indications (as selected by visual means during the Unit 2 fifth refueling outage) by ultrasonic techniques; the inspection will be performed from the accumulator tank outer diameter during the next inspection period to verify that the indications have not progressed beyond the acceptance curves as provided within WCAP-13689 (proprietary), "Integrity Evaluation of Indications in the Safety Injection Accumulator Tanks for Diablo Canyon Units 1 and 2." The next inspection period for Unit 2 begins in 1996; therefore, the reexamination will be scheduled to take place during the Unit 2 eighth refueling outage.

The enclosures to this letter include: (1) WCAP-13711 (non-proprietary), and (2) Affidavit CAW-93-452 supporting the proprietary nature of WCAP-13689. WCAP-13689 was previously transmitted to the NRC by PG&E Letter No. DCL-93-093. WCAP-13711 is a non-proprietary version of WCAP-13689.

As WCAP-13689 contains information proprietary to Westinghouse Electric Corporation, it is supported by an affidavit signed by Westinghouse, the owner of the information. The affidavit sets forth the basis on which the information may be withheld from public disclosure by the NRC, and addresses with specificity the considerations listed in 10 CFR 2.790(b)(4).

ADD 1/1

April 28, 1993

Accordingly, it is respectfully requested that the information which is proprietary to Westinghouse be withheld from public disclosure in accordance with 10 CFR 2.790.

Correspondence with respect to the copyright or proprietary aspects of the enclosures should reference CAW-93-452 and should be addressed to N. J. Liparulo, Manager of Nuclear Safety & Regulatory Activities, Westinghouse Electric Corporation, P.O. Box 355, Pittsburgh, Pennsylvania 15230-0355.

Sincerely,

Gregory M. Rueger
