SUBJECT Licensee's request for license termination				
SUMMARY AND ACTION REQUIRED (IF ANY) I contacted Mt. Torgerson and requested that he submit the following additional information in support of the licensee' request for termination of their NRC license: 1. Form 314 was incomplete in that you did not describe how the material was disposed/transferred. 2. Submit evidence that transferor was licensed to receive the material that you transferred for disposal. 3. Submit results of last leak test to verify that the source was not leaking. Mr. Torgerson stated that they used one source licensed on the NRC license and that source was transferred to the company's Canadian license. Also, the most recent leak test indicated that the sources was not leaking when it was transferred. I requested that he submit signed documentation confirming the above.
