SUBJECT: NRC INSPECTION REPORT 50-275/95-15; 50-323/95-15 AND NOTICE OF  
VIOLATION

This refers to the inspection conducted by J. Russell, S. Boynton, and D. Acker of this office on September 15 through October 28, 1995, at the Diablo Canyon Nuclear Power Plant, Units 1 and 2, facility. The purpose of the inspection was to determine whether activities authorized by the license were conducted safely and in accordance with NRC requirements. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress. The results of this inspection are documented in the enclosed report.

Based on the results of this inspection, the NRC has determined that one cited and four non-cited violations of NRC requirements occurred. The violation is cited in the enclosed Notice of Violation (Notice) and the circumstances surrounding it are described in detail in the subject inspection report. The cited violation, performing core alterations without containment closure, is of concern because a similar condition had been identified, but corrective actions had not been implemented for over a year.

The non-cited violations in the radiological protection area are of concern because they each involve a failure to follow established procedures. While each is considered individually of low safety significance and they involved different radiological protection procedures, they indicate a weakness in individual's attention to detail in performance of work activities.

During this inspection period, a personnel error resulted in a 16 hour loss of offsite power to Unit 1, which was shutdown at the time. This will be the subject of a special inspection (275/95-17).

PDR ADDCK 05000275  
Q PDR

You are required to respond to this letter and should follow the instructions specified in the enclosed Notice when preparing your response. In your response, you should document the specific actions taken and any additional actions you plan to prevent recurrence. Your response may reference or include previous docketed correspondence, if the correspondence adequately addresses the required response. After reviewing your response to this Notice, including your proposed corrective actions and the results of future inspections, the NRC will determine whether further NRC enforcement action is necessary to ensure compliance with NRC regulatory requirements.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter, its enclosure(s), and your response will be placed in the NRC Public Document Room (PDR). To the extent possible, your response should not include any personal privacy, proprietary, or safeguards information so that it can be placed in the PDR without reduction.

The responses directed by this letter and the enclosed Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, Pub. L. No. 96.511.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

  
J. E. Dyer, Director  
Division of Reactor Projects
