Docket No. 50-275, OL-DPR-80
Docket No. 50-323, OL-DPR-82
Diablo Canyon Units 1 and 2
10 CFR 50.59 Safety Evaluation for Installation of the Component Cooling Water
Surge Tank Pressurization System

Dear Commissioners and Staff:

Pursuant to an NRC Staff request of May 23, 1997, PG&E is submitting the enclosed licensing basis impact evaluation (LBIE), including a 10 CFR 50.59 safety evaluation, for installation of the component cooling water (CCW) surge tank pressurization system on Unit 1. Since the LBIEs for both units are almost identical, the LBIE for Unit 2 is not enclosed; both were approved by the Plant Staff Review Committee on April 15, 1996. The CCW surge tank pressurization systems for both units are controlled by an equipment control guideline. In License Amendment Request 97-05 (ref. PG&E letter DCL-97-074 dated May 22, 1997), PG&E proposed placing these systems under the control of technical specifications.

Sincerely,

A handwritten signature in black ink, appearing to read 'Lawrence F. Womack'. The signature is written in a cursive, flowing style.

Lawrence F. Womack
