Auxiliary Feedwater Flow Reduction Bases Changes - Transmittal of Proprietary Information Documents

Dear Commissioners and Staff:

On September 29, 1995, PG&E submitted for your information (PG&E letter DCL-95-217), a revision of the Bases for Technical Specification 3/4.7.1.2, "Auxiliary Feedwater System." The revision reduced the minimum auxiliary feedwater flow requirements. The changes also included expansion of the Bases consistent with NUREG-1431, "Standard Technical Specifications - Westinghouse Plants."

In accordance with 10 CFR 50.59, this Bases revision became effective on August 16, 1995, upon review and approval by the Plant Staff Review Committee and Plant Manager. The supporting documentation for this change included a Westinghouse proprietary report. The purpose of this letter is to transmit the associated proprietary transmittal documents that were not included with the original letter (DCL-95-217).

The enclosure contains the Proprietary Information from Public Disclosure, a Proprietary Information Notice, Copyright Notice, and an accompanying Affidavit CAW-96-1046 signed by Westinghouse, the owner of the information. The affidavit sets forth the basis on which the information may be withheld from public disclosure by the Commission, and it addresses with specificity the considerations listed in paragraph (b) (4) of 10 CFR 2.790 of the Commission's regulations. PG&E requests that the Westinghouse proprietary information be withheld from public disclosure in accordance with 10 CFR 2.790.

**Westinghouse Proprietary Information from Public Disclosure,
Proprietary Information Notice, Copyright Notice, and Affidavit
Supporting Technical Report**

Proprietary Information Notice

Transmitted herewith are proprietary and/or non-proprietary versions of documents furnished to the NRC in connection with requests for generic and/or plant-specific review and approval.

In order to conform to the requirements of 10 CFR 2.790 of the Commission's regulations concerning the protection of proprietary information so submitted to the NRC, the information which is proprietary in the proprietary versions is contained within brackets, and where the proprietary information has been deleted in the non-proprietary versions, only the brackets remain (the information that was contained within the brackets in the proprietary versions having been deleted). The justification for claiming the information so designated as proprietary is indicated in both versions by means of lower case letters (a) through (f) contained within parentheses located as a superscript immediately following the brackets enclosing each item of information being identified as proprietary or in the margin opposite such information. These lower case letters refer to the types of information Westinghouse customarily holds in confidence identified in Sections (4)(ii)(a) through (4)(ii)(f) of the affidavit accompanying this transmittal pursuant to 10 CFR 2.790(b)(1).

Copyright Notice

The reports transmitted herewith each bear a Westinghouse copyright notice. The NRC is permitted to make the number of copies of the information contained in these reports which are necessary for its internal use in connection with generic and plant-specific reviews and approvals as well as the issuance, denial, amendment, transfer, renewal, modification, suspension, revocation, or violation of a license, permit, order, or regulation subject to the requirements of 10 CFR 2.790 regarding restrictions on public disclosure to the extent such information has been identified as proprietary by Westinghouse, copyright protection notwithstanding. With respect to the non-proprietary versions of these reports, the NRC is permitted to make the number of copies beyond those necessary for its internal use which are necessary in order to have one copy available for public viewing in the appropriate docket files in the public document room in Washington, DC and in local public document rooms as may be required by NRC regulations if the number of copies submitted is insufficient for this purpose. Copies made by the NRC must include the copyright notice in all instances and the proprietary notice if the original was identified as proprietary.
