December 1, 2016

Mr. Kriss M. Kennedy
Regional Administrator
U.S. NRC, Region IV
612 E. Lamar Blvd, Suite 400
Arlington, TX 76011-4005

Dear Mr. Kennedy:

Enclosed is a copy of the radiological emergency preparedness final report for the Grand Gulf Nuclear Station Medical Services Drill drills evaluated on October 27, 2016. FEMA Region VI staff evaluated the Riverland Medical Center and the Northeast Louisiana Ambulance Service. Five Level 2 Findings were identified and corrected during the drill. In addition, one plan issue was identified during the drill.

Based on the results of the drill, the offsite radiological emergency response plans and preparedness for the State of Louisiana and the affected local jurisdictions are deemed adequate to provide reasonable assurance that appropriate measures can be taken to protect the health and safety of the public in the event of a radiological emergency. Therefore, 44 CFR Part 350 approval of the offsite radiological emergency response plans and preparedness for the State of Louisiana-specific to Grand Gulf Nuclear Station will remain in effect.

A copy of this report was forwarded to the U. S. Nuclear Regulatory Commission Document Control Desk in Rockville, Maryland. Should you have questions, please contact me at (940) 898-5398.

Sincerely,

Nan Williams
RAC Chair
