

**Additional Comments Received at September 26, 2016 Public Meeting on NRC staff initiative to update
RG 1.206, "Combined License Applications for Nuclear Power Plants"**

Affected Section	Comment/Basis	Recommendation	NRC staff response
1. C.2.3, Application Electronic Submittal	It would be a good idea to add paragraph related to referencing a DC renewal that is either certified or under review.	Consider adding a paragraph	Revised as suggested.
2. C.2.3, Application Electronic Submittal	Concern was expressed over whether hyperlinks to materials such as those incorporated by reference in a DC will function once the document is in ADAMS.	Please address.	Due to document ownership issues, this cannot be accommodated by NRC staff via ADAMS which maintains the links provided by licensees and applicants without revising them. ADAMS does provide helpful information for broken links. Licensees and applicants could provide access separate to ADAMS and maintain the links if they so choose.
3. C.2.7, Design Center Review Approach	Page 4: content of Part 7 of COLA: Suggest correction to clarify that just summary information, not detailed evaluation is required. We can add that detailed information is available via audit. Also NEI had similar comment on C.1.7.	Revise text.	Revised DG accordingly.
4. C.2.7, Design Center Review Approach	Endorsement letter section, end of first paragraph. Suggest replacing "typically" with "may". The second bullet point is actually not done by every DCWG.	Revise text.	Revised accordingly.
5. C.2.7, Design Center Review Approach	Page 4 discusses content of Part 7 of COLA with guidance regarding what information an applicant must provide.	Please correct to clarify that just summary information, not a detailed evaluation, is required. An applicant's detailed information is available via audit. NEI had provided a similar comment on C.1.7.	Revised accordingly.

Affected Section	Comment/Basis	Recommendation	NRC staff response
6. C.2.9, Inspections, Tests, Analyses, and Acceptance Criteria	The draft section was not available in time for the public meeting.	Please share a draft copy of the section.	A draft version was posted to the public meeting website on 9/27/16.
7. C.2.16, Finalizing Licensing-basis Information for COLs	Consider mentioning 10 CFR Part 21 in the DC error discussion. Are the items on the "no-defer" list appropriate?	Please make available for comment ASAP and consider including discussion of 10 CFR Part 21.	A draft version was posted to the public meeting site on 10/25/16 which was informed by the public meeting discussion. The draft now includes discussion of 10 CFR Part 21 as well as 10 CFR 52.6. NRC staff had further discussion of the examples of changes that cannot be deferred before finalizing the draft made available. The list remains unchanged.
