

**Risk-Informed Improvements to the Standard Technical Specifications (STC)**

Background:

Consistent with the Commission's policy statement on technical specifications and the use of PRA, the NRC and the industry have currently developed eight initiatives and associated Technical Specifications Task Force (TSTF) travelers for fundamental improvements to the STS to emphasize the goal of constructing technical specifications that reinforce the pro-active management of the total risk presented by the plant configuration and actions that may be needed to respond to emergent conditions. Below please find details on the Initiatives, related TSTFs and associated ADAMS ML#s:
