SUBJECT: RIVER BEND STATION – NRC CONFIRMATORY ORDER FOLLOW-UP  
INSPECTION 05000458/2016407

Dear Mr. Maguire:

On November 17, 2016, the U.S. Nuclear Regulatory Commission (NRC) completed a Confirmatory Order follow-up team inspection at your River Bend Station and discussed the results of this inspection with you and other members of your staff. The results of this inspection are documented in the enclosed report.

The NRC inspectors did not identify any finding or violation of More-than-Minor significance.

During this inspection, the NRC examined activities conducted under your license as they relate to public health and safety and compliance with the Commission's rules and regulations and with the conditions of your license. Within these areas, the inspection consisted of selected examination of procedures and representative records, observations of activities, and interviews with personnel.

This inspection focused on assessing activities related to the implementation of the commitments described in Confirmatory Order Letter EA-14-009, issued December 3, 2014 (ML14198A338). Confirmatory Order Letter EA-14-009 confirmed the Entergy commitments to ensure the Safeguards Information control improvement actions of the Order are complete. Specifically, this inspection reviewed the action items associated with the subject commitments to determine which were completed, and the enclosed inspection report describes the results of those reviews. This report documents the NRC's conclusion that the requirements of the Confirmatory Order have been met.

This letter will be made available for public inspection and copying at <http://www.nrc.gov/reading-rm/adams.html> and at the NRC Public Document Room in accordance with 10 CFR 2.390, "Public Inspections, Exemptions, Requests for Withholding."

**"Enclosure transmitted herewith contains SUNSI. When separated from enclosure, this transmittal document is decontrolled."**
