11555 Rockville Pike  
Rockville, MD 20852-2738

Attention: Document Control Desk

Subject: Submission of a Request for a Revision to Certificate of Compliance  
(CoC) No. 9225 for the NAC-LWT Cask Incorporating Changes to the  
Authorized NRU/NRX Fuel Content

Docket 71-9225

- References:
1. USNRC CoC No. 9225, Revision 67, Model No. NAC-LWT Package, Dated October 14, 2016
  2. USNRC CoC No. 9225, Revision 64, Model No. NAC-LWT Package, Dated June 24, 2015
  3. ED201500112, Submission of NAC-LWT Safety Analysis Report (SAR), Revision 44 Incorporating Highly Enriched Uranyl Nitrate Liquid (HEUNL) and the SLOWPOKE Fuel Core Approved Application, August 18, 2015

NAC International (NAC) hereby submits a request to revise the NAC-LWT Certificate of Compliance (CoC) No. 9225, Revision 67 (Reference 1) to include changes to the authorized NRU/NRX fuel contents. The changes requested by this submittal allow shipping of up to 18 damaged NRU/NRX fuel assemblies, including dunnage, using the previously approved NRU/NRX shipping hardware. This submittal also corrects editorial errors in Table 1.2-15, with the values provided for NRU (LEU) Maximum Burnup (MWd) and maximum <sup>235</sup>U Depletion (%).

Additionally, NAC is requesting that CoC Revision 64 (Reference 2) remain active until December 31, 2017 in order to support on-going shipments. This request was previously approved in CoC Revision 67 (Reference 1).

The LWT-SAR Rev. 44 (Reference 3) has been used as the base document to which the requested changes have been made. Enclosure 4 contains the SAR changed pages and Enclosure 1 contains the list of SAR changes made. Enclosure 2 contains supporting calculations and Enclosure 3 contains the proposed CoC changes. Consistent with NAC administrative practice, this proposed SAR revision is numbered to uniquely identify the applicable changed pages. Revision bars mark the SAR text changes on the NAC-LWT SAR Revision 16B pages. In accordance with NAC's administrative practices, upon final acceptance of this application, the NAC-LWT SAR Revision 16B

ED20160104

Page 2 of 2

changed pages will be reformatted and incorporated into the next revision of the NAC-LWT SAR.

This submittal contains NAC proprietary information and Attachment 1 is a signed affidavit, executed by Mr. George Carver, Vice President, Engineering and Licensing, requesting this proprietary information be withheld from public disclosure via 10 CFR 2.390.

If you have any questions regarding this letter, please feel free to contact me on my direct number at 678-328-1236.

Sincerely,

Wren Fowler  
Director, Licensing  
Engineering

---

George Carver (Affiant), VP Engineering and Licensing, NAC International, hereinafter referred to as NAC, at 3930 East Jones Bridge Road, Norcross, Georgia 30092, being duly sworn, deposes and says that:

1. Affiant has reviewed the information described in Item 2 and is personally familiar with the trade secrets and privileged information contained therein, and is authorized to request its withholding.
2. The information to be withheld includes the following NAC Proprietary Information that is being provided to support the technical review of NAC's Request for a Certificate of Compliance (CoC) (No. 9225) for the NAC LWT Transport Package.
  - NAC-LWT SAR, Revision 16B pages marked as "NAC PROPRIETARY INFORMATION"
  - NAC Calculation 65007700-3000, Rev. 2 and data disk 1 of 1

NAC is the owner of the information contained in the above document. Thus, all of the above identified information is considered NAC Proprietary Information.

3. NAC makes this application for withholding of proprietary information based upon the exemption from disclosure set forth in: the Freedom of Information Act ("FOIA"); 5 USC Sec. 552(b)(4) and the Trade Secrets Act; 18 USC Sec. 1905; and NRC Regulations 10 CFR Part 9.17(a)(4), 2.390(a)(4), and 2.390(b)(1) for "trade secrets and commercial financial information obtained from a person, and privileged or confidential" (Exemption 4). The information for which exemption from disclosure is herein sought is all "confidential commercial information," and some portions may also qualify under the narrower definition of "trade secret," within the meanings assigned to those terms for purposes of FOIA Exemption 4.
4. Examples of categories of information that fit into the definition of proprietary information are:
  - a. Information that discloses a process, method, or apparatus, including supporting data and analyses, where prevention of its use by competitors of NAC, without license from NAC, constitutes a competitive economic advantage over other companies.
  - b. Information that, if used by a competitor, would reduce their expenditure of resources or improve their competitive position in the design, manufacture, shipment, installation, assurance of quality or licensing of a similar product.
  - c. Information that reveals cost or price information, production capacities, budget levels or commercial strategies of NAC, its customers, or its suppliers.
  - d. Information that reveals aspects of past, present or future NAC customer-funded development plans and programs of potential commercial value to NAC.

**NAC INTERNATIONAL  
AFFIDAVIT PURSUANT TO 10 CFR 2.390**

---

- e. Information that discloses patentable subject matter for which it may be desirable to obtain patent protection.

The information that is sought to be withheld is considered to be proprietary for the reasons set forth in Items 4.a, 4.b, and 4.d.

5. The information to be withheld is being transmitted to the NRC in confidence.
6. The information sought to be withheld, including that compiled from many sources, is of a sort customarily held in confidence by NAC, and is, in fact, so held. This information has, to the best of my knowledge and belief, consistently been held in confidence by NAC. No public disclosure has been made, and it is not available in public sources. All disclosures to third parties, including any required transmittals to the NRC, have been made, or must be made, pursuant to regulatory provisions or proprietary agreements, which provide for maintenance of the information in confidence. Its initial designation as proprietary information and the subsequent steps taken to prevent its unauthorized disclosure are as set forth in Items 7 and 8 following.
7. Initial approval of proprietary treatment of a document/information is made by the Vice President, Engineering, the Project Manager, the Licensing Specialist, or the Director, Licensing – the persons most likely to know the value and sensitivity of the information in relation to industry knowledge. Access to proprietary documents within NAC is limited via “controlled distribution” to individuals on a “need to know” basis. The procedure for external release of NAC proprietary documents typically requires the approval of the Project Manager based on a review of the documents for technical content, competitive effect and accuracy of the proprietary designation. Disclosures of proprietary documents outside of NAC are limited to regulatory agencies, customers and potential customers and their agents, suppliers, licensees and contractors with a legitimate need for the information, and then only in accordance with appropriate regulatory provisions or proprietary agreements.
8. NAC has invested a significant amount of time and money in the research, development, engineering and analytical costs to develop the information that is sought to be withheld as proprietary. This information is considered to be proprietary because it contains detailed descriptions of analytical approaches, methodologies, technical data and/or evaluation results not available elsewhere. The precise value of the expertise required to develop the proprietary information is difficult to quantify, but it is clearly substantial.

**NAC INTERNATIONAL  
AFFIDAVIT PURSUANT TO 10 CFR 2.390**

---

9. Public disclosure of the information to be withheld is likely to cause substantial harm to the competitive position of NAC, as the owner of the information, and reduce or eliminate the availability of profit-making opportunities. The proprietary information is part of NAC's comprehensive spent fuel storage and transport technology base, and its commercial value extends beyond the original development cost to include the development of the expertise to determine and apply the appropriate evaluation process. The value of this proprietary information and the competitive advantage that it provides to NAC would be lost if the information were disclosed to the public. Making such information available to other parties, including competitors, without their having to make similar investments of time, labor and money would provide competitors with an unfair advantage and deprive NAC of the opportunity to seek an adequate return on its large investment.

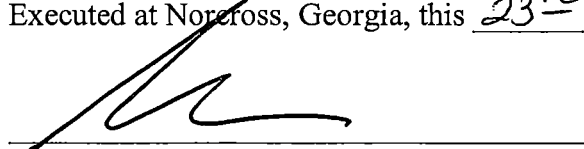

NAC INTERNATIONAL  
AFFIDAVIT PURSUANT TO 10 CFR 2.390

STATE OF GEORGIA, COUNTY OF GWINNETT

Mr. George Carver, being duly sworn, deposes and says:

That he has read the foregoing affidavit and the matters stated herein are true and correct to the best of his knowledge, information and belief.

Executed at Norcross, Georgia, this 23<sup>rd</sup> day of December, 2016.

George Carver  
VP, Engineering and Licensing  
NAC International
