**LICENSEE:**

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

- 1. Based on the inspection findings, no violations were identified.
- 2. Previous violation(s) closed.
- 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, to exercise discretion, were satisfied.

\_\_\_\_\_ Non-cited violation(s) were discussed involving the following requirement(s):

- 4. During this inspection, certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited in accordance with NRC Enforcement Policy. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.  
(Violations and Corrective Actions)

**Statement of Corrective Actions**

I hereby state that, within 30 days, the actions described by me to the Inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

Field Office Inspection \_\_\_\_\_

Temporary Job Site Inspection Central Michigan University; Mt. Pleasant, Michigan

**PROGRAM SCOPE**

The licensee was performing licensed operations at Central Michigan University; Mount Pleasant, Michigan within Brooks Hall and CART Building under reciprocity. Licensed operations consisted of radiological surveys and remediation to support Central Michigan University's plan to remove the two buildings from the license and designate them for unrestricted use.

**Observations and Findings**

The inspector observed the licensee's radiological survey technique and daily checks of radiological instrumentation and did not identify any abnormal issues. The inspector interviewed licensee staff and noted training was adequate to support licensed operations. The inspector performed limited radiological surveys in areas previously surveyed by the licensee; the inspector did not identify any abnormal radioactive residual contamination. No violations were identified during the inspection.
